企业简介 Company Profile

中国规模最大的集建筑涂料、保温、地坪的研发、生产、销售和施工为一体的大型现代化企业。

中国500强房地产开发企业首选品牌
国家建筑涂料标准副主编单位
中国涂料工业协会理事单位

富思特新材料科技发展股份有限公司始创于1995年，是中国建筑工程领域涂料保温一体化解决方案专业供应商。20年来，凭借“精准、精专、精进”的理念，专注于精品建筑外墙装饰完美效果的研究与应用，累计施工面积达3亿平米，并以每年超30%的增长速度引领行业发展。

Largest modern Chinese enterprise that integrates building coating, heat preservation as well as research and development, production, sale and construction of flooring.

First choice of China's top 500 real estate developers
Associate editor of the Building Coating Standards of the State
Governing unit of China Coating Association

Founded in 1995, First New Material Technology Development Co., Ltd. is a business entity that specializes in offering total solutions for coating and heat preservation in China's constructional engineering realm. Operated under the philosophy of precision, profession and progress, First has committed itself to the research and application of the perfect results on external wall decoration for competitive buildings over the past two decades, involving a total construction area of 300 million square meters. Presently, we have been playing a leading role among business peers with an annual growth rate of over 30%.

富思特液态花岗石涂料 超越真石的完美

富思特液态花岗石采用全水性进口高分子树脂聚合物、高档无机颜料和各种助剂，经过高科技工艺加工而成。具有天然花岗石材质高雅大气的装饰效果，且轻质、施工简单、方便。是一种环保、安全和性能卓越的高科技产品。具有装饰性、实用性、科学性、耐久性等诸多性能，是建筑涂料领域的一次革命性突破。

FIRST liquid granite is made of imported allaqueous high molecular polymer, high-class inorganic pigments and various agents through high-tech processing art.

It has as elegant and grand decoration effect as natural granite material, yet it is light, easy-to-construct and convenient. It is a kind of environmental-friendly, safe and high-tech product with superior performances. With diversified characteristics such as decorative, practical, scientific and enduring, it is a breakthrough in architectural paints field.

适用于各种建筑物的外墙、内墙，可以实现几十种天然花岗石装饰效果。

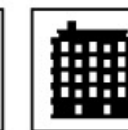

It is applicable to the exterior walls, interior walls, and it can achieve the decoration effect of dozens of natural granites.

富思特液态花岗石 **10** 大特点

10 major features of FIRST liquid granite

绿色环保 Environmental-friendly

完全属于水性产品，无任何溶剂等挥发物。已取得中国环境标志产品认证，环保性极佳。
Absolutely water-based product, and no volatiles such as solvent. It has acquired China Environmental Labeling Product Certificate with wonderful environmental protection property.

节约能源 Energy-saving

在外墙的装饰中，可替代资源日趋稀少的宝贵石材，还能配合外墙外保温材料进行专业的仿花岗石装饰。无需打龙骨进行施工，减少钢材资源的使用。

In the decoration of exterior wall, it can replace the precious thinning out stone material. And it can coordinate with the insulation material of the exterior wall to make professional granite-like decoration. It can be constructed without priming the keel so as to reduce the usage of steel resource.

优异的抗龟裂性能 Outstanding anti-cracking performance

具有一定的柔韧性，使其能非常有效地遮盖墙面上的细小裂纹，保持涂层的牢固和光滑。
As it is flexible to a certain extent, so it can effectively cover the small cracks on the wall so as to maintain the firmness and smoothness of the coating layer.

高仿真性 High simulation

在色彩上模仿天然花岗石，同时加入一些夸张的手法，视觉上可以以假乱真，达到巧夺天工，胜过天然的效果。

It simulates natural granite in color, and meanwhile, by adding some exaggeration effect, it looks like real granite visually to achieve the exquisite effect which is even better than the natural granite.

创意性强 High creativity

设计与施工不受任何限制，可根据设计师的意图任意改变花岗石的形状。也可根据建筑本身的设计、灵活地体现建筑物的线条与层次感。可适应任何不规则建筑墙面，可装饰任何弯曲、细边等部分。

There is no limitation on its design and construction. Granite's shape can be changed freely according to designer's intension. And it can also show the lines and depth of the building flexibly based on the building's design. It is adaptable to any irregular architectural walls, and able to decorate any parts such as the curves and thin edges.

装饰效果多样 Diversified decoration effects

可采用平涂、砂壁中涂、真石漆、浮雕中涂等，同时选用半光、哑光罩光清漆来达到不同的装饰效果。

It can achieve different decoration effects by adopting such coating methods as flat coating, sand wall coating, stone-like painting and sculptural intermediate painting with semi-gloss, mat and ultra-gloss varnishes.

超强的自洁功能 Superior self-clean function

配套双组份氟碳罩光清漆或环保硅树脂罩光清漆作为面层的保护，可使墙面具有超强的自洁功能，以保墙面历久如新。

By equipped with two-component fluorocarbon ultra-gloss varnish or environmental-friendly silicone ultra-gloss varnish as the protection of the surface, it enables the wall to have superior self-clean function so as to keep the wall looks new forever.

耐刷洗，抗刮痕 Scrubbing-resistant and anti-scratches

施工中使用高品质罩光清漆做保护层，从而使涂层具有优异的耐磨性和耐洗刷性。

As high quality ultra-gloss varnish is used as the protection layer in construction, so the coating is equipped with superior abrasion-resistant and scrubbing-resistant properties.

超强的耐候性 Excellent weathering resistance

不论在普通环境下，还是在酸雨侵蚀等恶劣环境下，涂层都具有极强的适应力和抵抗力。使用寿命达15年以上。

No matter under regular environment or under adverse environmental condition like acid rain erosion, the coating has very strong applicability and resistance. And its life cycle period is above 15 years.

施工周期短 Short construction cycle

使用专用喷枪，可达到一枪多色的喷涂效果，一次成型，故可大大节省施工时间。

by adopting special spraying gun, it can achieve multi-color spraying effect by using one gun. And it can be shaped only by one-time spraying, so as to greatly save the construction time.

工艺流程
 Processing flow

基面处理
 Dispose the base surface

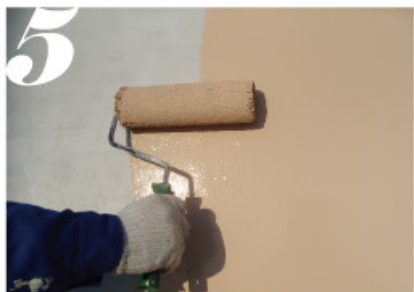

刮涂抗裂砂浆复合耐碱网格布
 Coat with anti-crack mortar composite alkali-resistant mesh

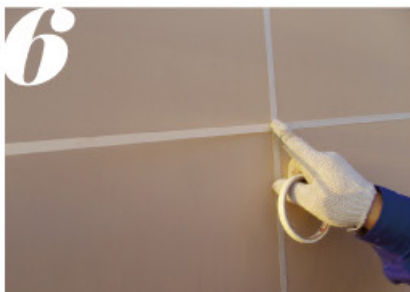

刮涂柔性耐水腻子
 Coat with flexible water resistant putty

滚涂抗碱封闭底漆
 Roller coating alkali resisting primer

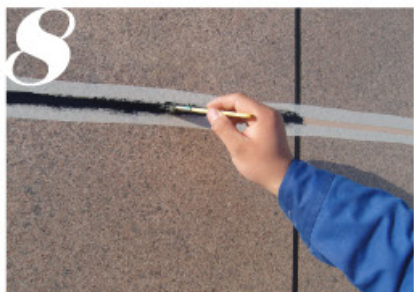

涂刷液态花岗石专用中间漆
 Brush the special intermediate paint of liquid granite

弹线分格、粘贴胶带
 Grid the wall with elastic line and paste the tape

喷涂液态花岗石
 Spray liquid granite

去除胶带、描线
 Remove tapes and lines

喷涂(或滚涂)液态花岗石专用罩光清漆
 Spray (or roller coating) the special varnish of liquid granite

注意事项

- * 同一墙面应该使用同一批次面漆产品，以免出现批次原因造成墙面色差。
- * 涂料的贮存和施工应符合产品说明书规定的气温条件。
- * 请勿与有机溶剂、酸碱、油等化学品混合。
- * 运输按《非危险品运输规则》办理。

Notices

- * One wall should use the same batch of paints so as to avoid color difference for batch reason.
- * The storage and construction of the paint should comply with the temperature condition speculated in the Product Manual.
- * Please don't mix it with chemical products including organic solvent, acid-base and oil.
- * Please transport it according to the "Non-dangerous Materials Rules".
